

Quality Assurance (Quality Assurance)

QA Process

- Unit Testing: Individual module testing
- Integration Testing: Full pipeline testing
- Regression Testing: Verify existing functionality
- Stress Testing: Load and stress testing

Validation Checklist

- ✓ Model performance criteria met (accuracy, AUC)
- ✓ Inference time < 100ms (real-time system)
- ✓ Subgroup performance balance (no bias)
- ✓ Security and privacy compliance

Test Types

- Shadow Mode Testing: Parallel execution before deployment
- Adversarial Testing: Attack scenario testing
- Edge Case Testing: Extreme case evaluation

- User Acceptance Testing (UAT): Clinical user evaluation
